

**CONTINUITY  
CONSOLIDATION  
CHANGE**

ALL TOGETHER TOWARDS SUCCESS

**EFRS EDUCATIONAL WING**

**The Educational Wing aims to promote and develop Radiography education and research across Europe.**

Between 2002 until 2008 a number of educational institutions and professional societies were actively involved in HENRE (Higher Education Network for Radiography in Europe), which was a Socrates/Erasmus funded thematic network. This group merged with the EFRS and the establishment of the EFRS Educational Wing was agreed by the EFRS General Assembly in 2010.

Since 2008 the number of cooperating educational institutions in the Educational Wing has grown from the 21 founding institutions from 13 countries to 49 institutions from 25 countries in 2015.

The Educational Wing meets annually in March during the European Congress of Radiology (ECR) and since 2011, there is a concurrent radiography student meeting.

**European Universities and other educational institutions which offer Radiography education are warmly invited to join the EFRS Educational Wing as EFRS Affiliate Member.**

---

## Radiographers Research Network (RRN)

The RRN is only accessible to members of the EFRS member organisations and integrates functions similar to other social media platforms to support contact with other researchers, exchange information, publish documents, create groups, post messages etc.

**Supporting Radiography Research Collaboration**

## Involvement benefits

- Inspiration for further professional development
- Exploring and sharing learning and teaching methods
- Establishing good evidence-based Radiography practice in Europe and enhancing its promotion
- EQF documents
- Access to collaborative research projects and activities
- Annual EFRS educational seminars at ECR
- Student forum at ECR
