

Official Journal of;

Radiography

Official Journal of:
The Society and College of Radiographers
The European Federation of Radiographer Societies

Radiography is the official peer-reviewed journal of the Society and College of Radiographers and the European Federation of Radiographer Societies.

Radiography promotes evidence-based practice by disseminating high quality clinical, scientific and educational research related to all aspects of diagnostic and therapeutic radiography. We publish research articles, systematic and narrative reviews, editorials and letters of international relevance that advance knowledge and encourage innovation within radiography.

Radiography is essential reading for researchers and practitioners (diagnostic and therapeutic radiographers, medical radiation technologists, radiologic technologists) and for radiography educators and students. We aim to influence clinical practice by informing managers, leaders and policy makers working within or aligned to clinical imaging and radiation therapy services.
